Westminster Village Resident Spotlight

*"I moved to Westminster Village in December of 2018, from Vincennes, Indiana. My daughter, Linda, lives in Parker and my family wanted me to live closer to her. I live in a Combo apartment and enjoy it very much. My windows have a wonderful view of the pond, the swans and gazebo. My apartment is large enough that I was able to bring many of my precious things, like a painting that my husband, John, painted and a cabinet filled with my special dishes. I look forward to attending the programs in Legacy Commons again. I always enjoyed the programs with children, and the Elvis impersonator. I love Elvis! I can't dance much anymore but I enjoyed attending the dances and watching the talented dancers. I have met so many new friends since I've been at Westminster. Everyone is very friendly and the staff is excellent. You never want for anything here. If you need something, all you need to do is ask. If you can no longer live at home, this is a very nice place to be. – **Mary Johnson** was born in Wheatland, Indiana and graduated from Vincennes Lincoln High. After high school, Mary was on a traveling bowling league and this was where she met a handsome man named John Andrew Johnson. They were married six months after their first date. John was a Conservation Officer and with his job, they moved 22 times, finally moving back to Vincennes. John and Mary were married for 49 wonderful years. They have two children, eleven grandchildren and one great grandchild. Mary was raised in the Vincennes Presbyterian Church, the same church where she and John were married, their children were baptized, John was a Deacon and Mary was a Deaconess. Mary's first job was as a bookkeeper with the Hoosier Gas Company, where she worked on an early version of a computer. She has always loved mathematical figures so working with the early computer technology was right up her alley!*

Senior Moments,

Been There...Done That!

We all remember that Popeye's strength came from cans of spinach, which he slurped down throughout

the day. It was in the 1890s that the vegetable was first declared a major source of iron, and during World War II, when iron-rich meat was

in short supply, spinach became a familiar alternative. As it turns out, its iron-rich reputation rested on a senior moment. A German chemist investigating the claim in the 1930's discovered that the original

19th Century researchers had made a tenfold mistake in calculating spinach's iron content by putting a decimal point in the wrong place. Unfortunately, parents didn't get the word, so it stayed on the plates of millions of suffering children, even though, as the science writer Richard Mould put it, "*For a source of iron, Popeye would have been better off chewing the cans!*"

Larger Apartments Available Now at Westminster Village

Quite often we have people that come in to tour our apartments and they ask if we have larger apartments. They let us know that

they have certain pieces of furniture that they want to bring with them or they feel too claustrophobic in a small apartment.

These people are happy to hear that we do

have large apartments that will accommodate their many possessions. Our larger *Kitchenette* apartments range in size from 815

square feet to 1,300 square feet, while

our largest *Full Kitchen* apartments are the two bedroom Deluxe Suites, at 1,046 square feet. Custom options like paint colors, dishwashers, ice makers, and more, are available in

most floor plans. If you would like to schedule a

tour, or if you just have questions, please call Tyler Ewing or Melody Scoble at 765-288-2155.

If you would like to opt out of this newsletter, please call Melody at 765-288-2155.
